ABOUT ME

I am a software developer with a 3-year diploma in Software Engineering from Aptech Learning Center. Skilled in front-end development, I create responsive and user-friendly websites focused on performance, functionality, and modern design.

Education

Iqra University (IU)   **March/2023 - Present**
Bachelor of Science in Software Engineering

CERTIFICATIONS

- 3-Year Diploma in Software Engineering (Aptech Learning Center)
- SALC Certificate
- Certified in Front-End Web Development – HTML, CSS, JavaScript, Bootstrap (Aptech Learning Center)

SELF-LEARNING EXPERIENCE

Front-End Web Development

In addition to my coursework at Aptech, I actively enhance my front-end development skills through online learning platforms such as freeCodeCamp, Coursera, and YouTube tutorials. I focus on building interactive and responsive websites using modern web technologies.

- **HTML5 & CSS3:** Developed responsive layouts and modern UI designs using CSS Flexbox and Grid.
- **JavaScript:** Implemented dynamic page elements and user interactions.
- **Bootstrap & Tailwind CSS:** Created mobile-first, consistent, and visually appealing interfaces.
- **React (Basic Understanding):** Learning component-based development for scalable front-end apps.
- **Version Control:** Practicing Git and GitHub for code collaboration and project tracking.
- **Web Deployment:** Familiar with hosting websites on GitHub Pages and Netlify.

WORK EXPERIENCE

Techigator eBook Software House
Front-End Developer

- Design and develop responsive, user-friendly book websites for clients using HTML, CSS, JavaScript, and WordPress.
- Collaborate with the design team to ensure visual consistency and a smooth user experience across all devices.
- Maintain, update, and optimize existing websites for improved performance and functionality.
- Implement client feedback and perform quality assurance testing to ensure website reliability and usability.

PROJECTS

Book Website

- Designed and developed a responsive online book website for clients using HTML, CSS, and JavaScript.
- Implemented search, category filters, and dynamic content to enhance user experience.

Movie Booking System

- Built a movie ticket booking web application allowing users to view, select, and reserve movie seats online.
- Developed using HTML, CSS, and JavaScript for dynamic content handling.

Library Management System

- Created a system to manage books, users, and borrowing records efficiently.
- Integrated with a MySQL database for real-time data storage and retrieval.
